

# Assignment 7-1:Design Sprint Day 4 - Low Fidelity Prototype

Start Assignment

Due Sunday by 11:59pm    Points 50    Submitting a text entry box or a file upload

## Day 4: Overview

As a group, review the feature sketches committed to Github by all of the team's members. Using these artifacts develop the final interface sketches for your team project.

Walk through your user stories and ensure that your interfaces contain all the necessary elements to capture the desired user interactions, user flow and behavior.

As a group submit the following:

One person on the team should upload your team final sketches here as well as to the group's github project's "Docs" folder. If you use an online prototyping tool such as framer you can submit the link to your project.

Design project					
Criteria	Ratings				Pts
Ability to design, implement and evaluate a software system to meet the identified needs .	<b>35 pts</b> <b>Excellent</b> Excellent design and superb implementation. Meets all functional requirements. Flexible design can accommodate potential future change. Takes careful account of all key constraints	<b>25 pts</b> <b>Satisfactory Design:</b> Satisfactory design. Flexible meeting all functional requirements. Bug free implementation. Accounts for several key constraints.	<b>15 pts</b> <b>Acceptable</b> Acceptable design that meets most functional requirements. Mostly bug free implementation. Accounts for some key constraints.	<b>5 pts</b> <b>Poor</b> Poor design. Focused on minimally meeting functional requirements. Significant bugs. Does not account for several key constraints.	35 pts
Spelling and grammar	<b>15 pts</b> <b>No grammar/spelling errors</b>	<b>10 pts</b> <b>Few grammar/spelling errors</b>	<b>5 pts</b> <b>Many Spelling and grammar errors</b>	<b>0 pts</b> <b>No Marks</b>	15 pts
